

## NON-PITTED PAVERS

FireRock non-pitted pavers offer an alternative to our classic pitted pavers while still maintaining the durability and affordability FireRock pavers are known for.

Our non-pitted pavers are hand-crafted using the same proprietary concrete mixture used for our pitted pavers. However, with these pavers, we eliminate our unique finishing process, which results in a smoother appearance.

Though our non-pitted pavers won't have the pitting that characterizes our standard pavers, they may still have small air bubbles, which are most prominent around the outside perimeter. These air bubbles are a by-product of the hand-crafted process used to create each paver.
